PROFILE:

Full-Stack Software Developer specialized in building scalable CRMs and ERP systems using Clean Architecture and SOLID principles, with proven expertise in developing RESTful APIs, optimized database designs, and responsive UIs. Experienced in the full SDLC, within Collaborative Agile environments to deliver high-quality, maintainable software solutions. Proficient in a diverse technical stack including Laravel, React, Python, and Java, with a strong foundation in MVC architecture and AWS cloud infrastructure.

PROFESSIONAL EXPERIENCE:

Freelance Full Stack Developer

2025 – Present

- Worked with clients to gather requirements and transform business needs into scalable web solutions.
- Consistently met deadlines while handling planning, development, testing, deployment, and ongoing support.
- Delivered production-ready applications for domains including fitness management, garage operations, and business automation.
- Communicated directly with clients to provide demos, collect feedback, and implement continuous improvements.
- Maintained and updated live systems while troubleshooting technical and deployment-related issues.

PROJECT EXPERIENCE:

AutoMate Garage Management System - <https://pathmasiriautoelectricals.online/>

PHP, Laravel, JavaScript, Tailwind CSS, Laravel Cloud, Cloudflare, PostgreSQL, Amazon S3

- Developed a backend-driven system for invoicing, inventory, and multi-role workflows.
- Designed database schema and APIs to support real-time operations.
- Delivered a production-ready solution based on client requirements in a Agile environment.
- Continuously improved features based on real-world usage and feedback.
- <https://github.com/gihan-tharuka/AutoMate-FG-Demo.git>

MediSys Patients Monitoring System - <https://api-update.dm3d5dvmmomnn.amplifyapp.com>

React, AWS, S3, DynamoDB , REST APIs, JWT, Cognito, Lambda, IAM, Amplify, SNS, SQS

- Built a serverless backend using AWS and front end using React.
- Implemented secure authentication using JWT and AWS Cognito with Least privilege access .
- Designed scalable architecture for real-time data processing and alerts.
- Focused on the AWS Well-Architected Framework and rigorously tested using Postman.
- <https://github.com/gihan-tharuka/medicare-patient-monitoring.git>

SYOS ERP System - <https://github.com/gihan-tharuka/SYOS-ERP-V3.git>

Java, Servlets, MySQL, JUnit , concurrency , design patterns

- Developed a modular ERP system using Java Servlets and MVC architecture.
- Implemented backend logic for inventory, transactions, and user roles and analytics.
- Applied design patterns (DAO, Singleton, Observer) for clean and maintainable code.
- Handled concurrency and added unit testing using JUnit.

DineMate Food Recommendation System

Python, Flask, MySQL, , SHAP, SQLAlchemy , Pandas, NumPy, PuLP, Scikit-learn

- Built a full-stack recommendation system using Python and Flask.
- Implemented data processing, model training, and optimization logic using machine learning libraries and linear programming.
- Generated personalized recommendations based on collaborative filtering, contextual awareness and Delivered recommendations via API endpoints with explainable AI.
- <https://github.com/gihan-tharuka/Food-Recommendation-System>

EDUCATION:

APIIT Lanka Affiliated with University of Staffordshire (UK)

- BEng (Hons) Software Engineering First class - 2022 to 2025
- Courses - Clean Coding And Concurrent Programming, Databases And Data Structures, Server-Side Programming, Enterprise Cloud And Distributed Web Applications, Mobile App Development, Networking Concepts And Cyber Security

S. Thomas' College Mt. Lavinia

GCE (Advanced Level) Examination - 2021/2022

- 2 A passes, 1 B pass

GCE (Ordinary Level) Examination - 2021/2022

- 4 A passes, 2 B passes, 3 C passes

CERTIFICATIONS:

- Certificate in Computer Studies - Siksil Institute of Business and Technology - 2018
- Certificate in English - Saegis Campus Nugegoda - 2018

SKILLS:

Programming Languages - PHP, Java, Python, JavaScript, HTML5, CSS3, C, C#

Frameworks - Laravel, Tailwind, ReactJS, Flutter, Selenium

Database Management - MySQL, Microsoft SQL Server, SQLite, PostgreSQL, S3, DynamoDB

Cloud - AWS (Lambda, S3, Cognito, SQS, SNS, IAM, Amplify) , Laravel Cloud, Forge, Cloudflare

Other technical tools - GitHub, Postman, XAMPP, PhpStorm, Figma, VS code, PyCharm, IntelliJ

Soft Skills - Problem solving, Teamwork, Time Management, Adaptability

Concepts - MVC, SOLID, Clean Code, REST, Agile, OOP, Design Patterns, PWA

PERSONAL REFEREES:

Mr. Hiran Rajapaksha

Technical Specialist

Wiley Global Technology (Pvt) Ltd

Phone: 0716824834

Email : hrajapaksh@wiley.com

Mr. Vipula Anandapiya

Director

Adlux Software (Pvt) Ltd
