PROFILE:

Full-Stack Developer specializing in the Laravel (v10+) ecosystem and modern web architectures. Proven expertise in building scalable Enterprise web solutions including CRMs and ERP systems using Clean Architecture and SOLID principles. Proficient in building seamless user interfaces with Livewire and Tailwind CSS, supported by a strong backend foundation in MVC architecture, Eloquent ORM for database optimization, and RESTful API development. Experienced in the full SDLC within Agile environments, with a strong foundation in AWS cloud infrastructure and a commitment to writing high-quality, maintainable code.

PROJECT EXPERIENCE:

AutoMate Garage Management System - <https://pathmasiriautoelectricals.online/>

Laravel, PHP, JavaScript, Tailwind CSS, Laravel Cloud, Cloudflare, PostgreSQL, Amazon S3

- Developed a backend-driven system for invoicing, inventory, and multi-role workflows.
- Designed database schema and APIs to support real-time operations.
- Delivered a production-ready solution based on client requirements in a Agile environment.
- Continuously improved features based on real-world usage and feedback.
- <https://github.com/gihan-tharuka/Automate-Demo-Application.git>

FlexiFit Fitness Center Management System - <https://flexifitofficial.online/>

Laravel, PHP , Tailwind CSS, REST APIs, JavaScript, Laravel Cloud, Cloudflare, Amazon S3

- Built and deployed a SaaS CRM to manage gym members, payments, and operations.
- Designed the architecture and implemented authentication with role-based access (admin, staff, users), web store with CMS features.
- Owned end-to-end development from ideation to production deployment.
- <https://github.com/gihan-tharuka/Flexifit-FG-Demo.git>

MediSys Patients Monitoring System - <https://api-update.dm3d5dvmmoomnn.amplifyapp.com>

React, AWS, S3, DynamoDB , REST APIs, JWT, Cognito, Lambda, IAM, Amplify, SNS, SQS, Postman

- Built a serverless backend using AWS and front end using React.
- Implemented secure authentication using JWT and AWS Cognito with Least privilege access .
- Designed scalable architecture for real-time data processing and alerts.
- Focused on performance, cost optimization per the AWS Well-Architected Framework and rigorously tested using Postman.
- <https://github.com/gihan-tharuka/medicare-patient-monitoring.git>

APIIT Students Blog - <https://github.com/Drawinakash0209/apiit-blog.git>

Laravel, php, JavaScript, Tailwind, MySQL, Selenium, Forge

- Developed a campus community platform using Laravel Livewire within MVC architecture.
- Implemented core features including event management, job postings, and blogging features.
- Built role-based access control and delivered the project across three Agile sprints.

SYOS ERP System - <https://github.com/gihan-tharuka/SYOS-ERP-V3.git>

Java, Servlets, MySQL, JUnit , concurrency , design patterns

- Developed a modular ERP system using Java Servlets and MVC architecture.
- Implemented backend logic for inventory, transactions, and user roles and analytics.
- Applied design patterns (DAO, Singleton, Observer) for clean and maintainable code.
- Handled concurrency and added unit testing using JUnit.

EDUCATION:

APIIT Lanka Affiliated with University of Staffordshire (UK)

- BEng (Hons) Software Engineering First class - 2022 to 2025
- Courses - Clean Coding And Concurrent Programming, Databases And Data Structures, Server-Side Programming, Enterprise Cloud And Distributed Web Applications, Mobile App Development, Networking Concepts And Cyber Security

S. Thomas' College Mt. Lavinia

GCE (Advanced Level) Examination - 2021/2022

- 2 A passes, 1 B pass

GCE (Ordinary Level) Examination - 2021/2022

- 4 A passes, 2 B passes, 3 C passes

CERTIFICATIONS:

- Certificate in Computer Studies - Siksil Institute of Business and Technology - 2018
- Certificate in English - Saegis Campus Nugegoda - 2018

SKILLS:

Programming Languages - PHP, JavaScript, HTML5, CSS3, Python, C , C#, Java,

Frameworks - Laravel, Tailwind, ReactJS, Flutter, Selenium

Database Management - MySQL, Microsoft SQL Server, SQLite, PostgreSQL, S3, DynamoDB

Cloud - AWS , Laravel Cloud, Forge, Cloudflare, Hostinger, Railway Hosting

Other technical tools - Postman, GitHub, XAMPP, PhpStorm, Figma, VS code, PyCharm, IntelliJ

Soft Skills - Problem solving, Teamwork, Time Management, Adaptability

Concepts - MVC, SOLID, Clean Code, REST, Agile, OOP, Design Patterns, PWA

PERSONAL REFEREES:

Mr. Hiran Rajapaksha

Technical Specialist

Wiley Global Technology (Pvt) Ltd
